Honeywell

Instant Communication

The Benefits Speak for Themselves

Talk about security! Honeywell's Audio Verification System (AVS) with two-way voice lets central station operators listen in and talk to you directly when an alarm signal is received—providing you with the added protection you deserve in an emergency.

Increased Peace of Mind

The AVS provides a live, direct line of communication with professional central station operators to determine the exact nature of an alarm (e.g. burglary, fire, medical crisis) and ensure a swift, accurate response during an emergency. The operators can provide assistance, comfort and reassurance until help arrives—greatly enhancing your peace of mind. Two-way voice may even startle or scare off a burglar because it proves authorities are on the way.

Alarm Verification

Operators can verify that an alarm is real before sending the police, fire department or ambulance to your home—reducing the nuisance and fear caused when emergency response personnel are dispatched to the site of a false alarm.

Superior Sound Quality

Honeywell's AVS provides excellent sound quality and range—facilitating crystal clear communication between you and the central station operator during an emergency.

Great for Caregivers

When combined with Honeywell's convenient panic pendants, the AVS is ideal for the elderly, caregivers or people who may require extra protection in the event of an injury, accident or medical emergency.

Outdoor Communication

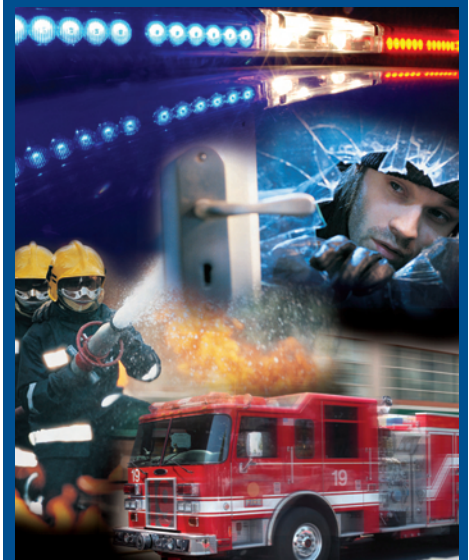

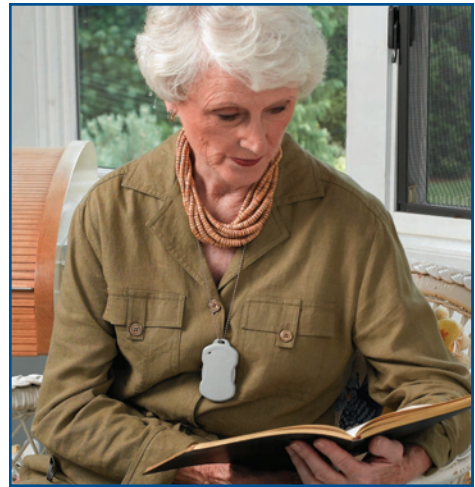

The system can be used outdoors, making it ideal for screened patios, wraparound porches, pool areas and decks.

Sleek, Stylish Design

The AVS has a modern, streamlined look that blends with any home décor.

The Ultimate Protection

Count on Honeywell's AVS for the simplest, most affordable way to bring convenient, instant communication into your home. It's an excellent complement to your existing security system—letting the central station understand the nature of an emergency, deal with the situation instantly and effectively, and provide you with ultimate protection. Ask your security professional for details today!
